Dashboard & Module Workflows

BLOCK FORMAT

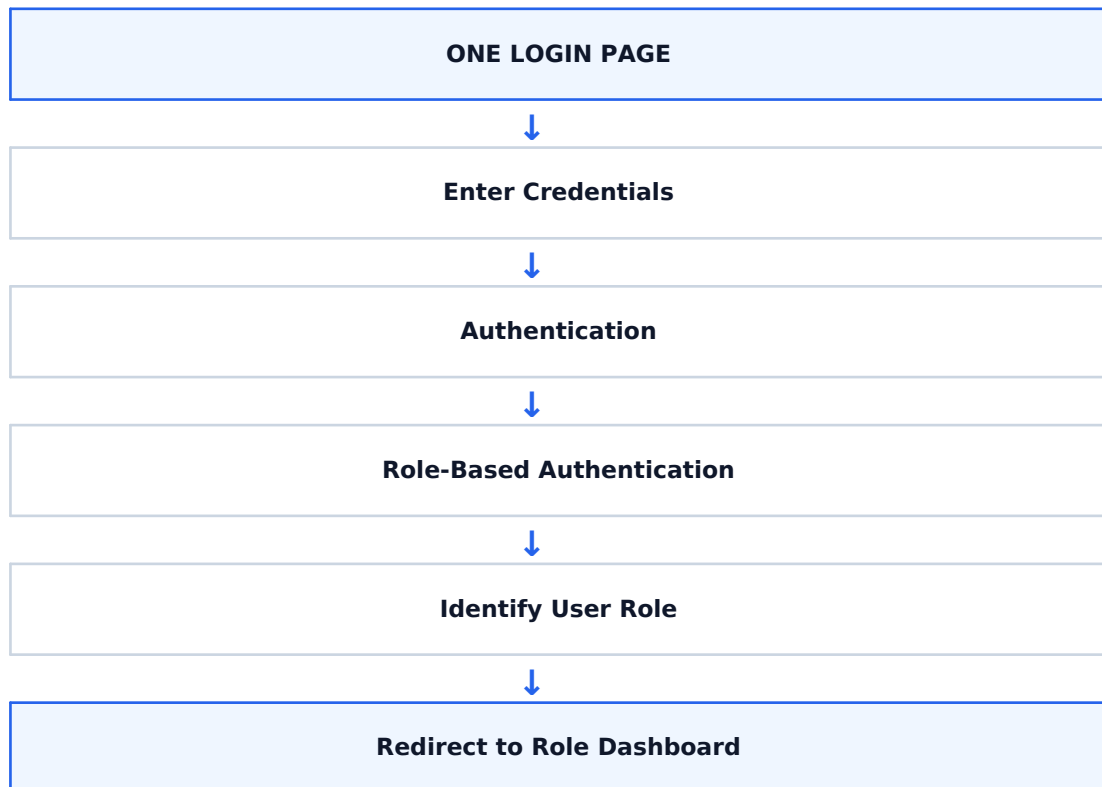

Easy-to-understand workflow diagrams

Client Portal • Employee Portal • Admin Panel

Lead	Contact Form → Lead → Success: Client / Failure: Rejected
Login	One Login Page → Role-Based Authentication → Role Dashboard
Client credentials	Lead converted to Client → Credentials Generated → Credentials Sent to Client Email
Scope	Based on the supplied PDF plus the latest requirements

Each workflow is shown as a sequence of visual blocks. Branches are shown separately where the process has a success or rejection outcome. No additional business logic has been introduced.

1. Common Login & Role-Based Authentication

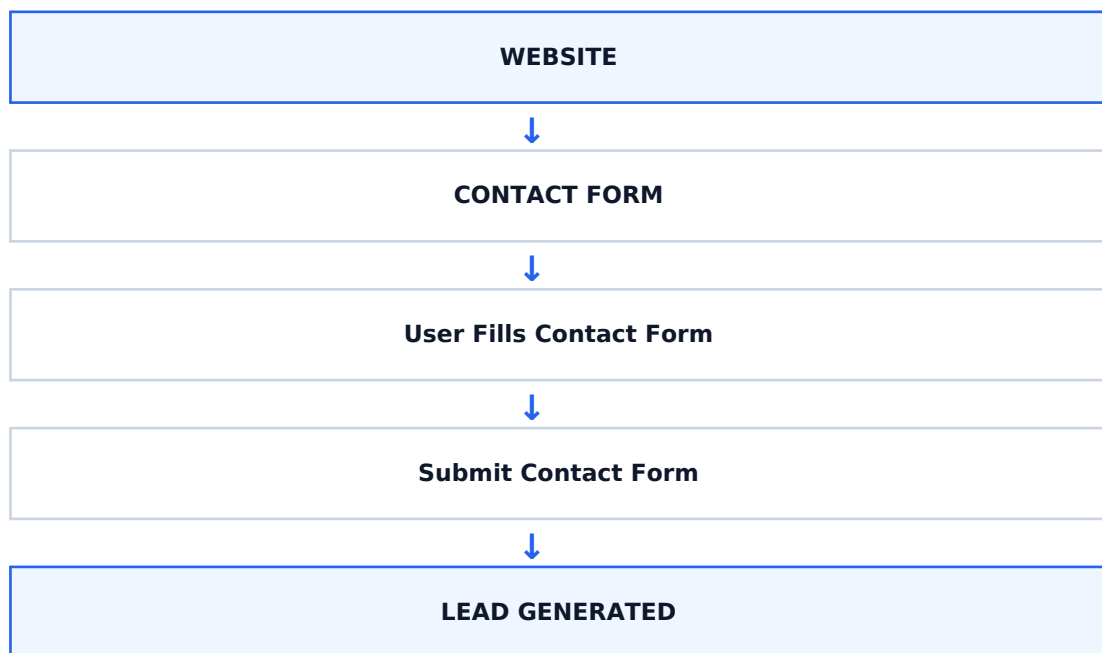

Role-based destination

User Role	Dashboard
Client	Client Portal Dashboard
Employee	Employee Portal Dashboard
Authorized Admin Role	Admin Panel Dashboard

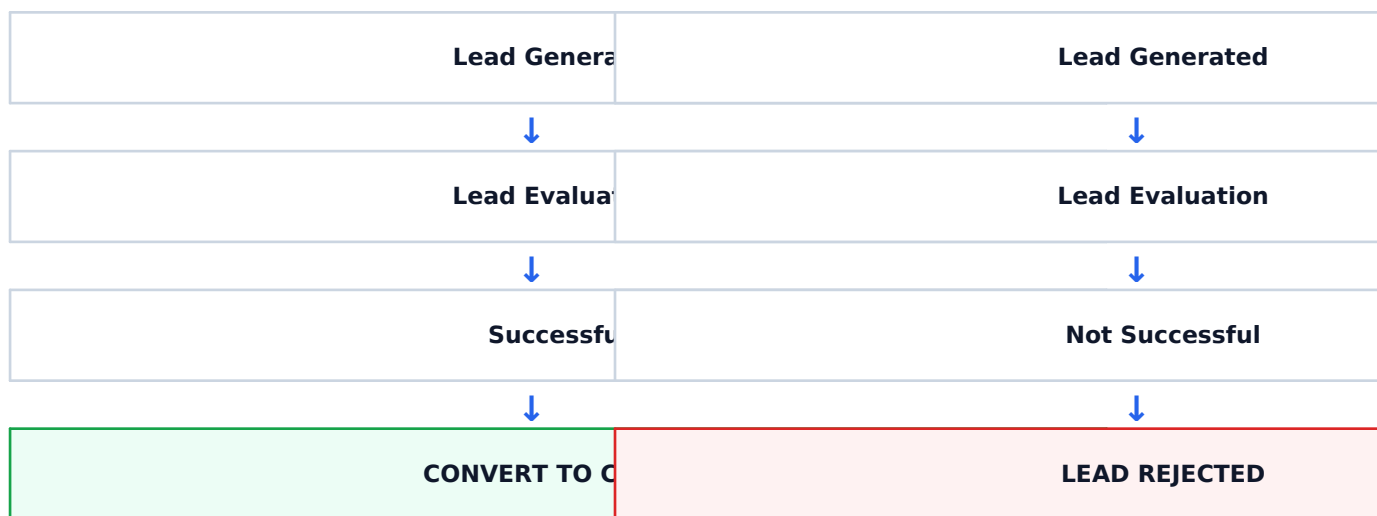

Registration page is removed. All users enter through the same login page. The exact dashboard mapping for every internal role listed in the source PDF is not specified, so this document does not invent individual mappings.

2. Contact Form → Lead → Client / Rejected

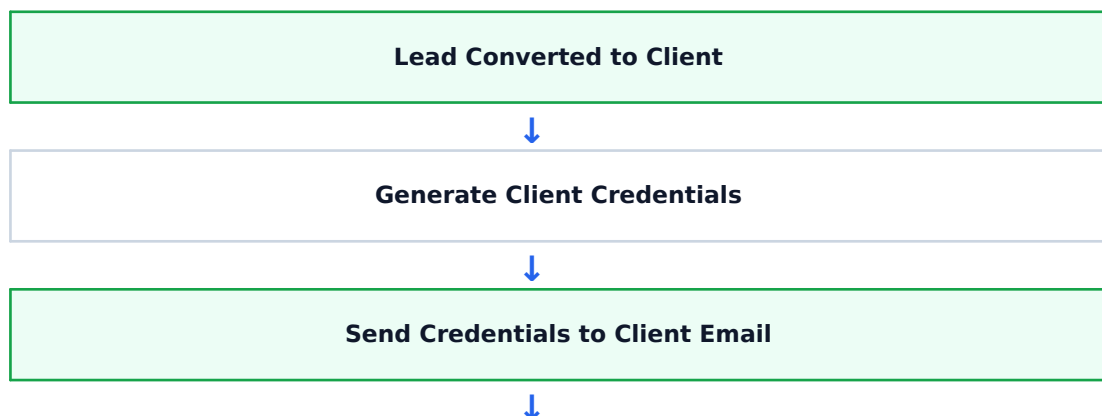

Lead generation

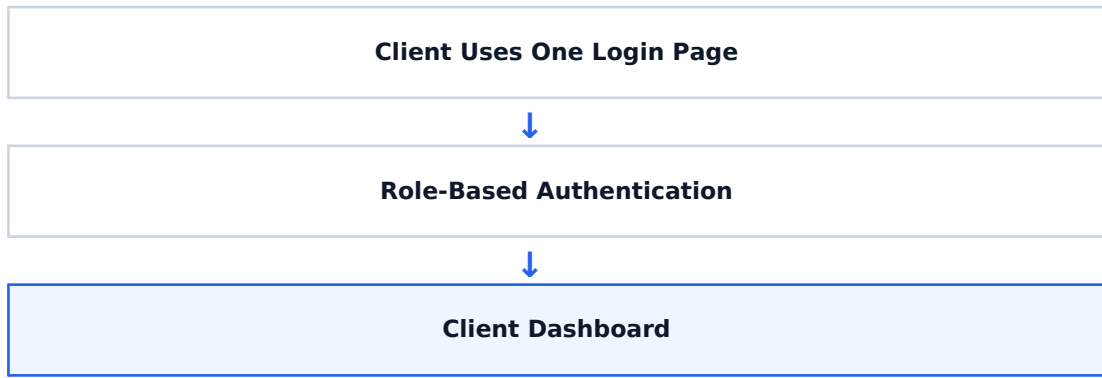

Lead outcome

Client credential flow after conversion

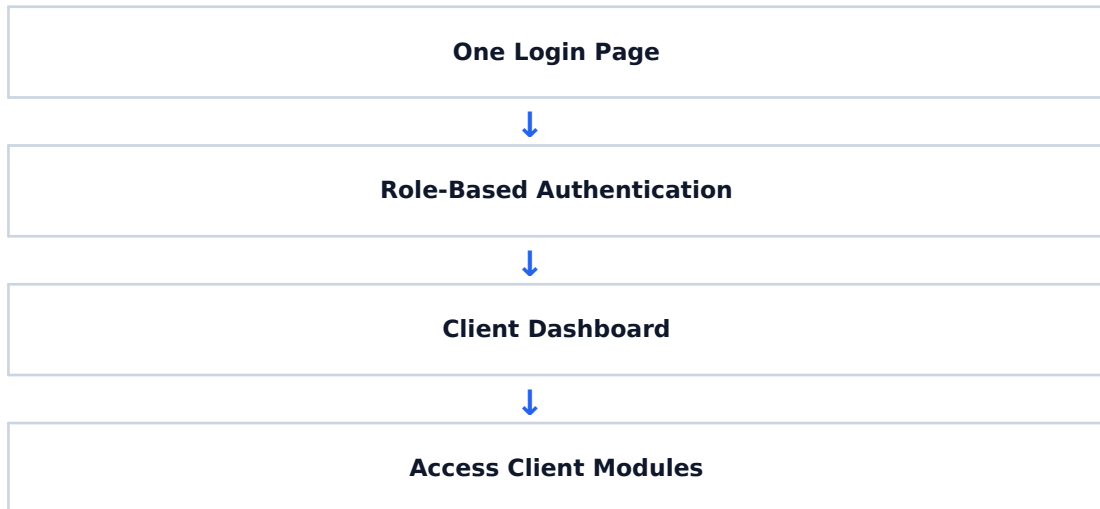

3. Client Portal — Module Workflows

The source PDF lists Dashboard, Projects, Invoices, Payments, Support, Files, Meetings and Reports.
